MAHAK SARLA

Senior Full Stack Developer | React.js | Node.js | Express.js | MongoDB | TypeScript

Indore, Madhya Pradesh 452010 | 7974994741 | mahaksarla@gmail.com

SUMMARY

Full Stack Developer with 4.5+ years of combined experience across freelance and full-time roles, specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) along with TypeScript and Next.js. Currently working as a Senior Software Developer at VortexCubes in a hybrid role, while independently delivering end-to-end freelance projects spanning Hospital Management Systems (HMS), CRM platforms, web applications, and mobile apps. Skilled at translating business requirements into scalable, production-ready software, leading feature development from architecture to deployment, and mentoring junior developers. Strong track record of managing multiple concurrent projects, meeting client deadlines, and driving continuous improvement in fast-paced, collaborative environments.

SKILLS

Industry Knowledge

- Web Application Development
- Mobile Application Development
- Server-Side Development
- REST API Design & Integration
- Full Stack (MERN) Development
- HMS & CRM Platform Development
- Application Architecture & Planning

Tools & Technologies

- React.js & React Native
- Next.js
- Node.js & Express.js
- JavaScript & TypeScript
- Redux.js
- MongoDB & SQL
- HTML5 & CSS
- Bootstrap & Tailwind CSS
- Flutter
- Embedded JavaScript (EJS)
- Git & GitHub
- Python
- Dart
- Firebase
- Docker
- AWS & GCP
- Jest
- Postman

Interpersonal Skills

- Problem Solving
- Team Collaboration
- Client Communication
- Time Management
- Project Planning
- Mentoring & Code Review
- Documentation Management

EXPERIENCE

Senior Software Developer — March 2024 – Present

VortexCubes | Indore (Hybrid)

- Lead development of full-stack web applications using React.js, Node.js, Express.js, and MongoDB, taking ownership of features from architecture through deployment.
- Design and build responsive, reusable React.js/Next.js UI components and robust REST APIs to power dynamic, data-driven applications.
- Collaborate with cross-functional teams using Git and GitHub, driving code reviews, mentoring junior developers, and streamlining deployment workflows.
- Work closely with stakeholders to translate business requirements into scalable technical solutions, improving application performance and user experience.

Freelance Full Stack Developer — March 2022 – Present

Self-Employed | Remote

- Deliver end-to-end web, mobile, and web applications for a diverse range of clients, including Hospital Management Systems (HMS), CRM platforms, e-commerce sites, and custom business applications.
- Build cross-platform mobile applications using React Native and Flutter, alongside responsive web apps using React.js, Next.js, and TypeScript.
- Design and develop cross-platform mobile apps using Flutter and Dart, covering UI implementation, state management, and REST API integration for Android and iOS releases.
- Develop and maintain server-side logic and REST APIs with Node.js, Express.js, and EJS, integrating MongoDB and SQL databases for data-driven functionality.
- Manage projects independently from requirement gathering to deployment, coordinating directly with clients and delivering solutions within agreed timelines and budgets.
